Desktop, tablet, mobile

NO ADMIN
Static lead-gen build

BUSINESS PROFILE

Owner: Yousuf Shaik

Mobile: 7396991224 | Business: 9494600741

Email: skytechaluminum@gmail.com | Instagram: @skytechaluminium

Shop: Shiridi Nagar Main Rd, Defence Colony, Hayathnagar Khalsa, Hyderabad, Telangana 501505

Core business: aluminium/uPVC windows and doors, partitions, glass, cladding, interiors, exteriors, architectural design, execution and wholesale product enquiries.

EXECUTIVE SUMMARY

What this website should become

A premium lead-generation website that combines aluminium/uPVC/glass products, wholesale enquiries, interiors/exteriors and architectural execution without sacrificing SEO crawlability.

1. **Brand position**

   Sky Tech Windows is presented as a single destination for aluminium/uPVC systems, glass, cladding, design and execution - plus wholesale product enquiries.

2. **Audience**

   Homeowners, builders, offices, shops, hospitality operators, contractors, fabricators and project buyers in Hyderabad and surrounding areas.

3. **Experience**

   Aesthetic 3D depth, material-like cards, profile/glass layers, pointer/touch response and polished transitions - no loud neon/gaming UI.

4. **SEO**

   Every meaningful product/service intent gets its own clean URL, real HTML content, descriptive metadata, internal links, sitemap and local business signals.

5. **Conversion**

   Primary actions: WhatsApp, call, request site visit, bulk enquiry and map directions. No ecommerce checkout required in this plan.

6. **No Admin Dashboard**

   Per client requirement: no login, no admin CMS, no visual editor. Build as a fast public site with code/config-driven content.

Verified planning details

Client-provided identity and contact information used throughout the website plan.

BUSINESS	SKY TECH WINDOWS
OWNER	Yousuf Shaik

SEO ARCHITECTURE

Search-first structure without boring design

3D visuals sit around semantic HTML content; they never replace the crawlable service/product information.

1 URL rules

Lowercase descriptive slugs, hyphens between words, one canonical intent per route, no unnecessary query-string navigation.

2 On-page

Unique title tag, H1, introduction, descriptive subheadings, service/product specifics, image alt text and conversion CTA.

3 Internal linking

Home/category/project pages link into high-intent product/service pages; every detail page links back to parent and related services.

4 Local SEO

Consistent name/address/phone, location page for Hayathnagar, map/directions, LocalBusiness data and service-area copy.

5 Images & media

Use descriptive filenames, WebP/AVIF where suitable, width/height, lazy loading below fold and poster images for videos.

6 Structured data

Use LocalBusiness/Organization and BreadcrumbList appropriately; Service/Product/FAQ only when page content genuinely supports it.

7 Technical

XML sitemap, robots.txt, canonical tags, metadata, Open Graph, fast mobile pages, accessible navigation and crawlable links.

8 Content quality

Do not mass-duplicate city/service paragraphs. Each page needs distinct useful information, project examples and FAQs based on real services.

RESEARCH BASIS

Google Search Central URL guidance; current Indian aluminium/glass industry catalogs from Asia Aluminium, Hakimi Glass, Alumil, Skylight Enterprises and other category references were used to expand taxonomy beyond the client-supplied list.

How the website should feel

Architectural depth rather than neon effects: layered profiles, glass planes, panels, rooms and facade geometry respond to pointer, scroll and touch.

1. **Material depth**

   Use aluminium frame extrusions, glass panes, ACP/HPL panels and room planes as the visual language. Soft shadows, neutral backgrounds, metallic/teal accents.

2. **Pointer interactions**

   On desktop, cards tilt 2-5 degrees, glass/profile layers parallax slightly and product diagrams rotate only when the pointer is over the visual area.

3. **Touch interactions**

   On mobile/tablet, drag or press changes depth/angle. Never depend on hover to reveal essential content or navigation.

4. **Scroll choreography**

   Use restrained section transitions: reveal, slide, layered depth and occasional pinned visual; keep text readable and content order logical.

5. **Reduced motion**

   Respect prefers-reduced-motion; replace 3D movement with static rendered states and normal fades.

6. **Performance**

   Lazy-load heavy 3D scenes, use low-poly/optimized textures, pause offscreen animations and preserve good Core Web Vitals.

RESPONSIVE + TOUCH UX

Desktop, tablet and mobile rules

The 3D character survives on phones, but usability and conversion remain first.

1. **Navigation**
   Desktop mega menu by Products / Glass / Design & Execution / Projects. Mobile uses a fast accordion drawer with direct Call + WhatsApp actions.

2. **100vh usage**
   Use full-viewport only for Home hero and selected visual experiences. Inner pages should not force every content section into 100vh if copy needs more space.

3. **Mobile 3D**
   Prefer 2.5D transforms and lightweight WebGL scenes. Finger drag moves a product/frame visual; tap opens details.

4. **Typography**
   Fluid clamp() sizing; no oversized display text that pushes essential content below fold.

5. **Forms**
   Large tap targets, phone keyboards, minimal fields, click-to-call and WhatsApp handoff.

6. **Accessibility**
   Visible focus states, keyboard navigation, semantic headings, alt text, contrast and reduced-motion fallback.

7. **Media**
   Responsive images with srcset/sizes; videos use poster images, muted previews only when appropriate and user-controlled playback.

8. **Testing**
   Test common Android phones, iPhone Safari, Chrome desktop, tablet widths and low-power/reduced-motion scenarios.

Lead-generation site • no admin dashboard

The client explicitly does not want the Studio Nirmiti-style admin editor. Keep the public site maintainable in code/config and optimize for search and enquiries.

1 Recommended stack

Next.js + TypeScript + component-driven CSS/Tailwind; Framer Motion/GSAP for DOM motion; React Three Fiber/Three.js only where genuine 3D adds value.

2 No admin/auth

Do not build admin login, CMS dashboard, page editor, role system or visual cloning editor.

3 Content source

Store route/product/service content in typed JSON/TS config or MDX so developers can update content without duplicating page code.

4 Forms

Lead form posts to a simple server endpoint/email service; WhatsApp and phone buttons remain primary. Add spam protection and validation.

5 Maps/local

Embed or link to map using exact supplied address. Keep NAP identical in footer/contact/location schema.

6 Analytics

GA4/Search Console readiness, conversion events for WhatsApp, call, form submit and map clicks.

7 Security

Environment variables for service keys, server-side validation, no secrets in client bundle, dependency updates.

8 Launch checklist

Canonical/meta, sitemap/robots, 404, redirects, schema validation, mobile QA, performance pass, form tests and Search Console submission.

SEO PAGE SPECIFICATION

Home

URL: / • Primary intent: aluminium windows, uPVC, glass, interiors and execution in Hyderabad

PAGE RULE

Home uses the only full hero.

1 Hero + 3D Product Stage

Full-viewport hero only on Home: layered aluminium frame, glass panel and room geometry respond to pointer/touch. Clear service summary and WhatsApp / Call CTAs.

2 Business Capability Strip

Animated category rail: Aluminium, uPVC, Glass, Interiors, Exteriors, Architecture, Execution, Wholesale.

3 Featured Systems

3D cards for windows, doors, partitions, wardrobes and cladding with hover depth and direct SEO links.

4 Interior + Exterior Story

Split spatial scene comparing indoor fit-out and facade/elevation work; content remains real HTML beside visual layer.

5 Wholesale Enquiry

Bulk aluminium/iron product enquiry panel with quantity, product type and callback/WhatsApp conversion.

6 Project Types

Residential, Commercial and Hospitality project cards with relevant case-study links.

7 3D Visualization & Walkthrough

Show render/walkthrough capability with lightweight poster/video previews and motion-safe fallbacks.

8 Trust + Process

Measure → Design → Fabricate/Plan → Execute → Handover, with location and service-area credibility.

9. Projects Preview

Filtered gallery by system and project type, each linking to project detail pages.

10. Local CTA + Map

Hayathnagar shop address, map/directions, two phone numbers, email, Instagram and WhatsApp action row.

3D / UX BEHAVIOR

Home may use the richest 3D scene: layered aluminium frame, glass and spatial geometry react to mouse/touch. Scroll transitions between categories; reduced-motion gets static imagery.

SEO / CONVERSION

Target: aluminium windows, uPVC, glass, interiors and execution in Hyderabad. Suggested schema: Organization/LocalBusiness on core pages + BreadcrumbList where applicable. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Core navigation page supporting discovery, credibility and lead capture.

SEO PAGE SPECIFICATION

About Sky Tech Windows

URL: /about-us • Primary intent: aluminium fabrication and interior execution company Hyderabad

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1 Opening Context

Compact brand statement - no repeated hero - explaining fabrication, design and execution under one roof.

2 What We Do

Service matrix covering aluminium, uPVC, glass, interiors, exteriors, architecture and execution.

3 Products + Wholesale

Explain supply/wholesale support for aluminium and iron products alongside project execution.

4 How We Work

Site visit, measurement, design, material selection, fabrication/procurement, installation and handover.

5 Project Types

Residential, commercial and hospitality capability with internal links.

6 Location + Contact

Hayathnagar address, phone/email/Instagram and direct enquiry actions.

3D / UX BEHAVIOR

Pointer: subtle depth/tilt/parallax only on visual cards. Touch: drag/press reveals depth or motion. Keep all SEO copy in semantic HTML. Respect reduced-motion.

SEO / CONVERSION

Target: aluminium fabrication and interior execution company Hyderabad. Suggested schema: Organization/LocalBusiness on core pages + BreadcrumbList where applicable. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Core navigation page supporting discovery, credibility and lead capture.

SEO PAGE SPECIFICATION

Contact & Shop Location

URL: /contact-us • Primary intent: Sky Tech Windows Hayathnagar contact and directions

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1 Contact Header

Direct business identity, owner name and response options - no decorative hero.

2 Quick Actions

Call owner, call business number, WhatsApp, email and Instagram buttons.

3 Shop Address

Full Shiridi Nagar Main Road address with landmark context.

4 Map & Directions

Embedded map or map link with clear directions CTA.

5 Enquiry Form

Name, phone, project/product need, location, approximate quantity/area, preferred callback.

6 Service Area Note

Hyderabad-focused service coverage with local SEO copy and links to primary services.

3D / UX BEHAVIOR

Pointer: subtle depth/tilt/parallax only on visual cards. Touch: drag/press reveals depth or motion. Keep all SEO copy in semantic HTML. Respect reduced-motion.

SEO / CONVERSION

Target: Sky Tech Windows Hayathnagar contact and directions. Suggested schema: Organization/LocalBusiness on core pages + BreadcrumbList where applicable. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Core navigation page supporting discovery, credibility and lead capture.

SEO PAGE SPECIFICATION

Projects Portfolio

URL: /projects • Primary intent: aluminium, glass, interior and exterior projects Hyderabad

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1. **Portfolio Intro**
   Compact project index with no hero; immediately expose filters and project types.
2. **Project Type Filters**
   Residential / Commercial / Hospitality.
3. **Work Type Filters**
   Aluminium / uPVC / Glass / ACP-HPL / Interiors / Exteriors / Execution.
4. **Masonry Project Grid**
   Image-led cards with location, scope and service tags.
5. **Case Study Preview**
   Selected detailed stories with related service internal links.
6. **Quote CTA**
   Site visit and quotation enquiry after portfolio proof.

3D / UX BEHAVIOR

Pointer: subtle depth/tilt/parallax only on visual cards. Touch: drag/press reveals depth or motion. Keep all SEO copy in semantic HTML. Respect reduced-motion.

SEO / CONVERSION

Target: aluminium, glass, interior and exterior projects Hyderabad. Suggested schema: Organization/LocalBusiness on core pages + BreadcrumbList where applicable. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Core navigation page supporting discovery, credibility and lead capture.

SEO PAGE SPECIFICATION

Residential Projects

URL: /projects/residential • Primary intent: home aluminium windows, interiors and glass work Hyderabad

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1 Project Intro

Introduce residential projects with project type, scope and visual-first filter controls.

2 Category Filters

Filter completed work by aluminium, uPVC, glass, cladding, interiors/exteriors and execution.

3 Featured Case Studies

Large editorial project cards with before/after or finished-work imagery.

4 System Details

For each case, show installed systems/materials and link to matching service/product pages.

5 3D Gallery Interaction

Cards tilt slightly on pointer, touch drag moves depth layers; reduced-motion gets static layout.

6 Conversion CTA

Request site visit / quotation with project-type preselected.

3D / UX BEHAVIOR

Pointer: subtle depth/tilt/parallax only on visual cards. Touch: drag/press reveals depth or motion. Keep all SEO copy in semantic HTML. Respect reduced-motion.

SEO / CONVERSION

Target: home aluminium windows, interiors and glass work Hyderabad. Suggested schema: BreadcrumbList + CollectionPage; individual case studies can use Article/CreativeWork as appropriate. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Project pages build trust and provide internal links back to relevant service/product pages.

SEO PAGE SPECIFICATION

Commercial Projects

URL: /projects/commercial • Primary intent: office partitions, glazing and commercial interiors Hyderabad

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1 Project Intro

Introduce commercial projects with project type, scope and visual-first filter controls.

2 Category Filters

Filter completed work by aluminium, uPVC, glass, cladding, interiors/exteriors and execution.

3 Featured Case Studies

Large editorial project cards with before/after or finished-work imagery.

4 System Details

For each case, show installed systems/materials and link to matching service/product pages.

5 3D Gallery Interaction

Cards tilt slightly on pointer, touch drag moves depth layers; reduced-motion gets static layout.

6 Conversion CTA

Request site visit / quotation with project-type preselected.

3D / UX BEHAVIOR

Pointer: subtle depth/tilt/parallax only on visual cards. Touch: drag/press reveals depth or motion. Keep all SEO copy in semantic HTML. Respect reduced-motion.

SEO / CONVERSION

Target: office partitions, glazing and commercial interiors Hyderabad. Suggested schema: BreadcrumbList + CollectionPage; individual case studies can use Article/CreativeWork as appropriate. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Project pages build trust and provide internal links back to relevant service/product pages.

SEO PAGE SPECIFICATION

Hospitality Projects

URL: /projects/hospitality • Primary intent: hotel restaurant glass aluminium interior execution Hyderabad

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1 Project Intro

Introduce hospitality projects with project type, scope and visual-first filter controls.

2 Category Filters

Filter completed work by aluminium, uPVC, glass, cladding, interiors/exteriors and execution.

3 Featured Case Studies

Large editorial project cards with before/after or finished-work imagery.

4 System Details

For each case, show installed systems/materials and link to matching service/product pages.

5 3D Gallery Interaction

Cards tilt slightly on pointer, touch drag moves depth layers; reduced-motion gets static layout.

6 Conversion CTA

Request site visit / quotation with project-type preselected.

3D / UX BEHAVIOR

Pointer: subtle depth/tilt/parallax only on visual cards. Touch: drag/press reveals depth or motion. Keep all SEO copy in semantic HTML. Respect reduced-motion.

SEO / CONVERSION

Target: hotel restaurant glass aluminium interior execution Hyderabad. Suggested schema: BreadcrumbList + CollectionPage; individual case studies can use Article/CreativeWork as appropriate. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Project pages build trust and provide internal links back to relevant service/product pages.

SEO PAGE SPECIFICATION

Wholesale Aluminium & Iron Products

URL: /wholesale-aluminium-iron-products • Primary intent: wholesale aluminium and iron products Hyderabad

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1 Bulk Enquiry Intro

State wholesale aluminium and iron product availability and contractor/fabricator enquiry intent.

2 Product Group Grid

Profiles/sections, accessories/hardware, iron/SS-related project materials and commonly requested system components.

3 Quantity + Specification Form

Product name, section/profile, quantity, length/size, delivery/pickup preference and contact number.

4 Wholesale Use Cases

Fabricators, contractors, interior teams, builders and project buyers.

5 Availability Note

Avoid hardcoded stock claims; show “confirm current availability and rate” CTA.

6 Pickup / Delivery Contact

Shop address, business phone and WhatsApp quote action.

7 Related Systems

Deep links to aluminium windows, partitions, doors, wardrobes and execution pages.

3D / UX BEHAVIOR

Pointer: subtle depth/tilt/parallax only on visual cards. Touch: drag/press reveals depth or motion. Keep all SEO copy in semantic HTML. Respect reduced-motion.

SEO / CONVERSION

Target: wholesale aluminium and iron products Hyderabad. Suggested schema: BreadcrumbList + Service; Product only when real product data is presented. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Wholesale intent needs a catalog + bulk quote funnel, not an ecommerce checkout unless later requested.

SEO PAGE SPECIFICATION

Aluminium Windows

URL: /aluminium-windows • Primary intent: aluminium windows Hyderabad

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1 Page Context

Directly introduce Aluminium Windows with search-focused copy and application summary - no full-screen hero.

2 System / Variant Explorer

Show practical variants, opening types, profile styles and configuration choices for aluminium windows.

3 Materials & Options

Explain aluminium profile finish, glass/panel combinations, hardware, colour and mesh options.

4 Applications

Residential rooms, balconies, offices, shops and project-specific use cases.

5 3D Interactive Detail

Exploded profile/frame visual or layered card rotates subtly with pointer/touch to explain construction.

6 Measurement & Installation

Site measurement, fabrication, fitting, alignment, sealing and final handover workflow.

7 Project Gallery

Relevant completed-work cards with internal links to projects and adjacent systems.

8 FAQ + Quote CTA

Search-driven FAQs plus WhatsApp/call/site-visit enquiry.

3D / UX BEHAVIOR

Pointer: subtle depth/tilt/parallax only on visual cards. Touch: drag/press reveals depth or motion. Keep all SEO copy in semantic HTML. Respect reduced-motion.

SEO / CONVERSION

Target: aluminium windows Hyderabad. Suggested schema: BreadcrumbList + Service; Product only when real product data is presented. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Research expansion: common industry categories include sliding/casement systems, slim profiles, partitions, wardrobes, mosquito systems and architectural glazing.

SEO PAGE SPECIFICATION

Aluminium Domal Windows

URL: /aluminium-domal-windows • Primary intent: Domal aluminium windows Hyderabad

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1. **Page Context**
   Directly introduce Aluminium Domal Windows with search-focused copy and application summary - no full-screen hero.
2. **System / Variant Explorer**
   Domal profile system overview
3. **Materials & Options**
   Sliding/openable configuration options
4. **Applications**
   Glass and mesh combinations
5. **3D Interactive Detail**
   Residential and commercial use cases
6. **Measurement & Installation**
   Site measurement, fabrication, fitting, alignment, sealing and final handover workflow.
7. **Project Gallery**
   Relevant completed-work cards with internal links to projects and adjacent systems.
8. **FAQ + Quote CTA**
   Search-driven FAQs plus WhatsApp/call/site-visit enquiry.

3D / UX BEHAVIOR

Pointer: subtle depth/tilt/parallax only on visual cards. Touch: drag/press reveals depth or motion. Keep all SEO copy in semantic HTML. Respect reduced-motion.

SEO / CONVERSION

Target: Domal aluminium windows Hyderabad. Suggested schema: BreadcrumbList + Service; Product only when real product data is presented. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Research expansion: common industry categories include sliding/casement systems, slim profiles, partitions, wardrobes, mosquito systems and architectural glazing.

SEO PAGE SPECIFICATION

Aluminium Sliding Windows

URL: /aluminium-sliding-windows • Primary intent: aluminium sliding windows Hyderabad

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1 Page Context

Directly introduce Aluminium Sliding Windows with search-focused copy and application summary - no full-screen hero.

2 System / Variant Explorer

Show practical variants, opening types, profile styles and configuration choices for aluminium sliding windows.

3 Materials & Options

Explain aluminium profile finish, glass/panel combinations, hardware, colour and mesh options.

4 Applications

Residential rooms, balconies, offices, shops and project-specific use cases.

5 3D Interactive Detail

Exploded profile/frame visual or layered card rotates subtly with pointer/touch to explain construction.

6 Measurement & Installation

Site measurement, fabrication, fitting, alignment, sealing and final handover workflow.

7 Project Gallery

Relevant completed-work cards with internal links to projects and adjacent systems.

8 FAQ + Quote CTA

Search-driven FAQs plus WhatsApp/call/site-visit enquiry.

3D / UX BEHAVIOR

Pointer: subtle depth/tilt/parallax only on visual cards. Touch: drag/press reveals depth or motion. Keep all SEO copy in semantic HTML. Respect reduced-motion.

SEO / CONVERSION

Target: aluminium sliding windows Hyderabad. Suggested schema: BreadcrumbList + Service; Product only when real product data is presented. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Research expansion: common industry categories include sliding/casement systems, slim profiles, partitions, wardrobes, mosquito systems and architectural glazing.

SEO PAGE SPECIFICATION

Aluminium Casement Windows

URL: /aluminium-casement-windows • Primary intent: aluminium casement windows Hyderabad

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1 Page Context

Directly introduce Aluminium Casement Windows with search-focused copy and application summary - no full-screen hero.

2 System / Variant Explorer

Show practical variants, opening types, profile styles and configuration choices for aluminium casement windows.

3 Materials & Options

Explain aluminium profile finish, glass/panel combinations, hardware, colour and mesh options.

4 Applications

Residential rooms, balconies, offices, shops and project-specific use cases.

5 3D Interactive Detail

Exploded profile/frame visual or layered card rotates subtly with pointer/touch to explain construction.

6 Measurement & Installation

Site measurement, fabrication, fitting, alignment, sealing and final handover workflow.

7 Project Gallery

Relevant completed-work cards with internal links to projects and adjacent systems.

8 FAQ + Quote CTA

Search-driven FAQs plus WhatsApp/call/site-visit enquiry.

3D / UX BEHAVIOR

Pointer: subtle depth/tilt/parallax only on visual cards. Touch: drag/press reveals depth or motion. Keep all SEO copy in semantic HTML. Respect reduced-motion.

SEO / CONVERSION

Target: aluminium casement windows Hyderabad. Suggested schema: BreadcrumbList + Service; Product only when real product data is presented. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Research expansion: common industry categories include sliding/casement systems, slim profiles, partitions, wardrobes, mosquito systems and architectural glazing.

SEO PAGE SPECIFICATION

Aluminium Doors

URL: /aluminium-doors • Primary intent: aluminium doors Hyderabad

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1 Page Context

Directly introduce Aluminium Doors with search-focused copy and application summary - no full-screen hero.

2 System / Variant Explorer

Show practical variants, opening types, profile styles and configuration choices for aluminium doors.

3 Materials & Options

Explain aluminium profile finish, glass/panel combinations, hardware, colour and mesh options.

4 Applications

Residential rooms, balconies, offices, shops and project-specific use cases.

5 3D Interactive Detail

Exploded profile/frame visual or layered card rotates subtly with pointer/touch to explain construction.

6 Measurement & Installation

Site measurement, fabrication, fitting, alignment, sealing and final handover workflow.

7 Project Gallery

Relevant completed-work cards with internal links to projects and adjacent systems.

8 FAQ + Quote CTA

Search-driven FAQs plus WhatsApp/call/site-visit enquiry.

3D / UX BEHAVIOR

Pointer: subtle depth/tilt/parallax only on visual cards. Touch: drag/press reveals depth or motion. Keep all SEO copy in semantic HTML. Respect reduced-motion.

SEO / CONVERSION

Target: aluminium doors Hyderabad. Suggested schema: BreadcrumbList + Service; Product only when real product data is presented. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Research expansion: common industry categories include sliding/casement systems, slim profiles, partitions, wardrobes, mosquito systems and architectural glazing.

SEO PAGE SPECIFICATION

45 mm Profile Doors

URL: /profile-doors-45mm • Primary intent: 45mm aluminium profile doors Hyderabad

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1. **Page Context**
   Directly introduce 45 mm Profile Doors with search-focused copy and application summary - no full-screen hero.
2. **System / Variant Explorer**
   45 mm profile construction
3. **Materials & Options**
   Door leaf and glass/panel options
4. **Applications**
   Handle, lock and hardware choices
5. **3D Interactive Detail**
   Office, home and shop applications
6. **Measurement & Installation**
   Site measurement, fabrication, fitting, alignment, sealing and final handover workflow.
7. **Project Gallery**
   Relevant completed-work cards with internal links to projects and adjacent systems.
8. **FAQ + Quote CTA**
   Search-driven FAQs plus WhatsApp/call/site-visit enquiry.

3D / UX BEHAVIOR

Pointer: subtle depth/tilt/parallax only on visual cards. Touch: drag/press reveals depth or motion. Keep all SEO copy in semantic HTML. Respect reduced-motion.

SEO / CONVERSION

Target: 45mm aluminium profile doors Hyderabad. Suggested schema: BreadcrumbList + Service; Product only when real product data is presented. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Research expansion: common industry categories include sliding/casement systems, slim profiles, partitions, wardrobes, mosquito systems and architectural glazing.

SEO PAGE SPECIFICATION

Slim Profile Doors

URL: /slim-profile-doors • Primary intent: slim aluminium profile doors Hyderabad

PLANNING NOTE Research expansion: specialist sites commonly separate glass partitions, toughened doors, structural glazing, mirrors and railings.

SEO PAGE SPECIFICATION

PVD Partitions

URL: /pvd-partitions • Primary intent: PVD partition work Hyderabad

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1 Page Context

Introduce PVD Partitions by application, finish and installation type.

2 Glass / Finish Options

Clear, frosted, tinted, reflective, decorative or application-relevant glass choices.

3 Hardware / Framing

Patch fittings, handles, channels, aluminium/slim profiles and hardware options where relevant.

4 Applications

Office, retail, residential and hospitality uses.

5 Safety & Measurement

Measurement, edge/fit planning and appropriate safety-glass selection for applicable work.

6 3D Material Interaction

Glass layers use restrained transparency/reflection; cursor/touch changes viewing angle without hiding text.

7 Gallery + Related Services

Relevant glass, partition, facade and aluminium links.

8 FAQ + Quote CTA

Enquiry form with approximate dimensions and site location.

3D / UX BEHAVIOR

Pointer: subtle depth/tilt/parallax only on visual cards. Touch: drag/press reveals depth or motion. Keep all SEO copy in semantic HTML. Respect reduced-motion.

SEO / CONVERSION

Target: PVD partition work Hyderabad. Suggested schema: BreadcrumbList + Service; Product only when real product data is presented. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Research expansion: specialist sites commonly separate glass partitions, toughened doors, structural glazing, mirrors and railings.

SEO PAGE SPECIFICATION

Structural Glazing

URL: /structural-glazing • Primary intent: structural glazing Hyderabad

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1 Page Context

Introduce Structural Glazing by application, finish and installation type.

2 Glass / Finish Options

Clear, frosted, tinted, reflective, decorative or application-relevant glass choices.

3 Hardware / Framing

Patch fittings, handles, channels, aluminium/slim profiles and hardware options where relevant.

4 Applications

Office, retail, residential and hospitality uses.

5 Safety & Measurement

Measurement, edge/fit planning and appropriate safety-glass selection for applicable work.

6 3D Material Interaction

Glass layers use restrained transparency/reflection; cursor/touch changes viewing angle without hiding text.

7 Gallery + Related Services

Relevant glass, partition, facade and aluminium links.

8 FAQ + Quote CTA

Enquiry form with approximate dimensions and site location.

3D / UX BEHAVIOR

Pointer: subtle depth/tilt/parallax only on visual cards. Touch: drag/press reveals depth or motion. Keep all SEO copy in semantic HTML. Respect reduced-motion.

SEO / CONVERSION

Target: structural glazing Hyderabad. Suggested schema: BreadcrumbList + Service; Product only when real product data is presented. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Research expansion: specialist sites commonly separate glass partitions, toughened doors, structural glazing, mirrors and railings.

SEO PAGE SPECIFICATION

Glass Railings & Balustrades

URL: /glass-railings • Primary intent: glass railing work Hyderabad

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1 Page Context

Introduce Glass Railings & Balustrades by application, finish and installation type.

2 Glass / Finish Options

Clear, frosted, tinted, reflective, decorative or application-relevant glass choices.

3 Hardware / Framing

Patch fittings, handles, channels, aluminium/slim profiles and hardware options where relevant.

4 Applications

Office, retail, residential and hospitality uses.

5 Safety & Measurement

Measurement, edge/fit planning and appropriate safety-glass selection for applicable work.

6 3D Material Interaction

Glass layers use restrained transparency/reflection; cursor/touch changes viewing angle without hiding text.

7 Gallery + Related Services

Relevant glass, partition, facade and aluminium links.

8 FAQ + Quote CTA

Enquiry form with approximate dimensions and site location.

3D / UX BEHAVIOR

Pointer: subtle depth/tilt/parallax only on visual cards. Touch: drag/press reveals depth or motion. Keep all SEO copy in semantic HTML. Respect reduced-motion.

SEO / CONVERSION

Target: glass railing work Hyderabad. Suggested schema: BreadcrumbList + Service; Product only when real product data is presented. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Research expansion: specialist sites commonly separate glass partitions, toughened doors, structural glazing, mirrors and railings.

SEO PAGE SPECIFICATION

HPL Panelling Work

URL: /hpl-panelling • Primary intent: HPL panelling Hyderabad

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1. **Page Context**
   Introduce HPL Panelling Work as an elevation / surface solution with direct local search copy.
2. **Material / Finish Library**
   HPL exterior/interior panel applications
3. **System Composition**
   Wood/stone/solid finish directions
4. **Design Applications**
   Sub-frame and fixing approach
5. **3D Elevation Viewer**
   Elevation and wall feature use cases
6. **Execution Process**
   Measurement, design layout, fabrication/cutting, installation and finishing.
7. **Projects + Cross-links**
   Link to exterior design, glazing and execution work.
8. **FAQ + Site Visit CTA**
   Capture building type, elevation area and location.

3D / UX BEHAVIOR

Pointer: subtle depth/tilt/parallax only on visual cards. Touch: drag/press reveals depth or motion. Keep all SEO copy in semantic HTML. Respect reduced-motion.

SEO / CONVERSION

Target: HPL panelling Hyderabad. Suggested schema: BreadcrumbList + Service; Product only when real product data is presented. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Research expansion: ACP/HPL and facade/elevation work should be distinct SEO destinations because search intent differs.

SEO PAGE SPECIFICATION

ACP Sheet / Composite Panel Work

URL: /acp-cladding • Primary intent: ACP cladding Hyderabad

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1 Page Context

Introduce ACP Sheet / Composite Panel Work as an elevation / surface solution with direct local search copy.

2 Material / Finish Library

ACP elevation and cladding applications

3 System Composition

Panel colour / finish families

4 Design Applications

Joint, groove and edge detailing

5 3D Elevation Viewer

Commercial facade and signage integration

6 Execution Process

Measurement, design layout, fabrication/cutting, installation and finishing.

7 Projects + Cross-links

Link to exterior design, glazing and execution work.

8 FAQ + Site Visit CTA

Capture building type, elevation area and location.

3D / UX BEHAVIOR

Pointer: subtle depth/tilt/parallax only on visual cards. Touch: drag/press reveals depth or motion. Keep all SEO copy in semantic HTML. Respect reduced-motion.

SEO / CONVERSION

Target: ACP cladding Hyderabad. Suggested schema: BreadcrumbList + Service; Product only when real product data is presented. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Research expansion: ACP/HPL and facade/elevation work should be distinct SEO destinations because search intent differs.

SEO PAGE SPECIFICATION

Facade & Elevation Work

URL: /facade-elevation • Primary intent: facade elevation aluminium glass ACP Hyderabad

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1. **Page Context**
   Introduce Facade & Elevation Work as an elevation / surface solution with direct local search copy.
2. **Material / Finish Library**
   ACP, HPL, aluminium and glass combinations
3. **System Composition**
   Layered 3D elevation composition
4. **Design Applications**
   Lighting / louvers / glazing integration
5. **3D Elevation Viewer**
   Residential and commercial elevation use cases
6. **Execution Process**
   Measurement, design layout, fabrication/cutting, installation and finishing.
7. **Projects + Cross-links**
   Link to exterior design, glazing and execution work.
8. **FAQ + Site Visit CTA**
   Capture building type, elevation area and location.

3D / UX BEHAVIOR

Pointer: subtle depth/tilt/parallax only on visual cards. Touch: drag/press reveals depth or motion. Keep all SEO copy in semantic HTML. Respect reduced-motion.

SEO / CONVERSION

Target: facade elevation aluminium glass ACP Hyderabad. Suggested schema: BreadcrumbList + Service; Product only when real product data is presented. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Research expansion: ACP/HPL and facade/elevation work should be distinct SEO destinations because search intent differs.

SEO PAGE SPECIFICATION

Architectural Designing

URL: /architectural-designing • Primary intent: architectural designing Hyderabad

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1 Page Context

Open directly with Architectural Designing scope and who it is for; no repeated hero.

2 Service Scope

Requirement + site brief

3 Planning / Options

Space and circulation planning

4 Deliverables

Elevation / facade concept

5 3D Experience

Drawings, visualization and coordination

6 Workflow

Brief → site/input study → concept → review → finalization → execution/support as applicable.

7 Related Services

Deep links to space planning, visualization, walkthroughs, interiors/exteriors and execution.

8 FAQ + Consultation CTA

Capture project type, location, area and service needed.

3D / UX BEHAVIOR

Pointer: subtle depth/tilt/parallax only on visual cards. Touch: drag/press reveals depth or motion. Keep all SEO copy in semantic HTML. Respect reduced-motion.

SEO / CONVERSION

Target: architectural designing Hyderabad. Suggested schema: BreadcrumbList + Service + FAQPage where applicable. Use descriptive title/H1, unique intro copy, internal links, optimized images, visible FAQ only where useful, and WhatsApp/Call/Site Visit CTA.

PLANNING NOTE Cross-sell design services separately from fabrication so architecture/interior prospects can enter without first choosing a material system.

SEO PAGE SPECIFICATION

Interior Designing

URL: /interior-designing • Primary intent: interior designing Hyderabad

PAGE RULE

INNER PAGE: no repeated full-screen hero. Begin with contextual content immediately.

1 Page Context

Open directly with Interior Designing scope and who it is for; no repeated hero.

2 Service Scope

Explain what is included in interior designing and the decisions supported.
