ANTIGRAVITY BUILD SPECIFICATION

SKY TECH WINDOWS
MASTER BUILD PROMPT

A complete agent specification for a 52-page SEO-first, 3D animated aluminium/uPVC/glass/interiors website. No admin dashboard.

NON-NEGOTIABLE

- Build every route in the blueprint.
- Only Home gets a full hero.
- No admin dashboard / login / CMS editor.
- Keep all SEO content real semantic HTML.
- 3D must be elegant, responsive and performance-safe.
- Use exact supplied business contact details.

AGENT ROLE

Mission & Role

ROLE

You are the lead product designer, senior front-end engineer, SEO architect and QA engineer. Build the complete Sky Tech Windows website from the attached 60-page blueprint. Do not reduce the route count or collapse distinct search intents into one generic page.

GOAL

Create a premium Hyderabad lead-generation website that showcases aluminium/uPVC/glass products, interiors/exteriors, architectural services, execution work and wholesale enquiries with aesthetic 3D interactions and strong organic-search foundations.

IMPORTANT

This is not Studio Nirmiti. Do not add its admin dashboard, visual editor, auth, roles or CMS. Sky Tech Windows requires a public site only.

SOURCE-OF-TRUTH DETAILS

Business Facts

BUSINESS

Name: SKY TECH WINDOWS | Owner: Yousuf Shaik | Mobile: 7396991224 | Business phone: 9494600741

DIGITAL

Email: skytechaluminum@gmail.com | Instagram: @skytechaluminium

LOCATION

Shiridi Nagar Main Rd, Defence Colony, Hayathnagar Khalsa, Hyderabad, Telangana 501505

POSITIONING

Aluminium/uPVC windows and doors, partitions, glass and mirror works, ACP/HPL/facade work, interiors, exteriors, architecture, space planning, modular kitchens, visualization, walkthroughs, supervision, execution and wholesale aluminium/iron product enquiries.

DO NOT VIOLATE THESE

Hard Rules

RULE 1

Only the Home page may have the cinematic/full-screen hero. All inner pages start with contextual content, breadcrumb/title and useful information immediately.

RULE 2

Do not create an admin dashboard, admin login, CMS, visual page editor, authentication or role-based access.

RULE 3

Never hide core SEO text inside canvas/WebGL. Every page must render semantic headings, paragraphs, links, image alt text and CTAs in HTML.

RULE 4

Do not use neon/gaming aesthetics. The 3D design must feel architectural: cream/stone backgrounds, dark teal, muted metal/gold, glass and aluminium depth.

IMPLEMENTATION FOUNDATION

Recommended Stack

FRAMEWORK

Next.js App Router + TypeScript. Use server components by default; client components only for interactive/3D islands.

STYLING

Tailwind CSS or well-structured CSS modules with design tokens. Use clamp() for fluid typography and consistent spacing.

MOTION

Framer Motion or GSAP for DOM transitions. React Three Fiber/Three.js for only a few genuine 3D scenes. Do not make the whole site a WebGL canvas.

CONTENT

Create typed route/content configuration in TypeScript/JSON/MDX so all 52 pages share reusable templates while keeping unique copy and metadata.

3D DESIGN LANGUAGE

Visual Direction

PALETTE

Use warm architectural neutrals, dark teal/green, soft brushed-metal gold accents and clear/grey glass. Avoid cyberpunk/neon gradients.

GEOMETRY

Use aluminium frames, profile cross-sections, glass panes, ACP/HPL panels, room planes, door tracks and modular grid shapes as 3D motifs.

DEPTH

Soft realistic shadows, restrained perspective, layered planes, 2-5° card tilt and subtle parallax. Keep content legible and premium.

COMPONENTS

Develop reusable 3DCard, ProfileExploder, GlassLayer, MaterialSwatch, ProjectTile, CategoryRail, DepthCTA and TouchOrbit components.

DESKTOP INTERACTION

Pointer & Scroll

POINTER

Use pointer position only inside relevant visual containers. Tilt cards subtly; do not make the entire page chase the cursor.

SCROLL

Use section reveals, depth transitions, occasional pinned visual explanation and smooth state changes. Never hijack native scrolling.

HOVER

Hover may enrich visuals but must not be the only way to access text, links, pricing/quote actions or product information.

PHONE & TABLET

Touch Experience

TOUCH

Map drag gestures to small visual rotations or layer shifts. Tap opens details. Disable hover-only requirements.

PERFORMANCE

Prefer CSS 3D / 2.5D on low-power mobile where full WebGL is unnecessary. Lazy-load 3D modules after primary content.

VIEWPORT

Do not force every section to 100vh. Use 100svh only for the Home hero or deliberately immersive visual modules.

QUALITY GATES

Accessibility + Performance

MOTION

Respect prefers-reduced-motion and replace 3D movement with static states/fades.

A11Y

Keyboard navigation, semantic headings, labels, visible focus, alt text, contrast and no essential information conveyed only through motion.

PERFORMANCE

Optimize GLTF, texture sizes, responsive images and video posters. Suspend offscreen animation. Target strong Lighthouse/Core Web Vitals rather than visual excess.

EVERY ROUTE

Technical SEO

METADATA

Generate unique title, description, canonical URL and Open Graph metadata for every route. Avoid duplicate descriptions.

CRAWLABILITY

All navigation and internal links must be normal anchor links. Generate sitemap.xml and robots.txt. Create a useful 404 page.

SCHEMA

LocalBusiness/Organization on core/local pages; BreadcrumbList where appropriate; Service/Product/FAQ only when the rendered page supports that data.

IMAGES

Descriptive filenames, alt text, dimensions and modern formats. Do not lazy-load the Home LCP image/critical visual incorrectly.

Local SEO

NAP

Keep SKY TECH WINDOWS, the supplied address and phone numbers consistent in footer, contact page, local page and structured data.

LOCATION PAGE

Build /hayathnagar-hyderabad with real local context, map/directions, services, enquiry CTAs and no fabricated reviews or project claims.

CONVERSIONS

Track call clicks, WhatsApp clicks, enquiry submissions and map/direction clicks.

Route Registry 1

ROUTES 1-18

01. / — Home — target: aluminium windows, uPVC, glass, interiors and execution in Hyderabad
02. /about-us — About Sky Tech Windows — target: aluminium fabrication and interior execution company Hyderabad
03. /contact-us — Contact & Shop Location — target: Sky Tech Windows Hayathnagar contact and directions
04. /projects — Projects Portfolio — target: aluminium, glass, interior and exterior projects Hyderabad
05. /projects/residential — Residential Projects — target: home aluminium windows, interiors and glass work Hyderabad
06. /projects/commercial — Commercial Projects — target: office partitions, glazing and commercial interiors Hyderabad
07. /projects/hospitality — Hospitality Projects — target: hotel restaurant glass aluminium interior execution Hyderabad
08. /wholesale-aluminium-iron-products — Wholesale Aluminium & Iron Products — target: wholesale aluminium and iron products Hyderabad
09. /aluminium-windows — Aluminium Windows — target: aluminium windows Hyderabad
10. /aluminium-domal-windows — Aluminium Domal Windows — target: Domal aluminium windows Hyderabad
11. /aluminium-sliding-windows — Aluminium Sliding Windows — target: aluminium sliding windows Hyderabad
12. /aluminium-casement-windows — Aluminium Casement Windows — target: aluminium casement windows Hyderabad
13. /aluminium-doors — Aluminium Doors — target: aluminium doors Hyderabad
14. /profile-doors-45mm — 45 mm Profile Doors — target: 45mm aluminium profile doors Hyderabad
15. /slim-profile-doors — Slim Profile Doors — target: slim aluminium profile doors Hyderabad
16. /aluminium-partitions — Aluminium Partitions — target: aluminium partitions Hyderabad
17. /office-aluminium-partitions — Office Aluminium Partitions — target: office aluminium partitions Hyderabad
18. /telescopic-partitions-16x45 — Telescopic Partition 16x45 — target: telescopic aluminium partition 16x45 Hyderabad

Route Registry 2

ROUTES 19-36

19. /slim-profile-partitions — Slim Profile Partitions — target: slim profile glass partitions Hyderabad
20. /aluminium-wardrobes — Aluminium Wardrobes — target: aluminium wardrobes Hyderabad
21. /profile-cupboards — Profile Cupboards — target: aluminium profile cupboards Hyderabad
22. /profile-pooja-doors-20mm — 20 mm Profile Pooja Doors — target: 20mm profile pooja doors Hyderabad
23. /aluminium-mosquito-open-doors — Aluminium Mosquito Open Doors — target: aluminium mosquito open doors Hyderabad
24. /aluminium-mosquito-sliding-doors — Aluminium Mosquito Sliding Doors — target: aluminium mosquito sliding doors Hyderabad
25. /ss-sliding-doors — SS Sliding Doors — target: stainless steel sliding doors Hyderabad
26. /pvc-sliding-mosquito-doors — PVC Sliding Mosquito Doors — target: PVC sliding mosquito doors Hyderabad
27. /upvc-windows — uPVC Windows — target: uPVC windows Hyderabad
28. /upvc-doors — uPVC Doors — target: uPVC doors Hyderabad
29. /upvc-partitions — uPVC Partitions — target: uPVC partitions Hyderabad
30. /upvc-elevation — uPVC Elevation Work — target: uPVC elevation work Hyderabad
31. /glass-works — Glass Works — target: glass works Hyderabad
32. /glass-doors-office — Office Glass Doors — target: office glass doors Hyderabad
33. /12mm-glass-partitions — 12 mm Glass Partitions — target: 12mm toughened glass partitions Hyderabad
34. /diamond-mirror-work — Diamond Mirror Work — target: diamond mirror work Hyderabad
35. /crystal-glass-work — Crystal Glass Work — target: crystal glass work Hyderabad
36. /pvd-partitions — PVD Partitions — target: PVD partition work Hyderabad

Route Registry 3

ROUTES 37-52

37. /structural-glazing — Structural Glazing — target: structural glazing Hyderabad
38. /glass-railings — Glass Railings & Balustrades — target: glass railing work Hyderabad
39. /hpl-panelling — HPL Panelling Work — target: HPL panelling Hyderabad
40. /acp-cladding — ACP Sheet / Composite Panel Work — target: ACP cladding Hyderabad
41. /facade-elevation — Facade & Elevation Work — target: facade elevation aluminium glass ACP Hyderabad
42. /architectural-designing — Architectural Designing — target: architectural designing Hyderabad
43. /interior-designing — Interior Designing — target: interior designing Hyderabad
44. /exterior-designing — Exterior Designing — target: exterior designing Hyderabad
45. /space-planning — Space Planning — target: space planning Hyderabad
46. /modular-kitchens — Modular Kitchens — target: modular kitchen Hyderabad
47. /furniture-selection — Furniture Selection — target: furniture selection interior design Hyderabad
48. /3d-visualization — 3D Visualization — target: 3D architectural visualization Hyderabad
49. /walkthroughs — 3D Walkthroughs — target: 3D walkthrough architecture Hyderabad
50. /project-supervision — Project Supervision — target: interior project supervision Hyderabad
51. /execution-works — Execution Works — target: interior exterior execution works Hyderabad
52. /hayathnagar-hyderabad — Sky Tech Windows in Hayathnagar, Hyderabad — target: aluminium windows and interior works Hayathnagar Hyderabad

Global Navigation

DESKTOP HEADER

Logo/wordmark + Products + Glass & Facade + Design & Execution + Projects + About + Contact, with visible WhatsApp/Call CTA.

MEGA MENU

Group aluminium/uPVC/doors/windows/partitions/wardrobes/mosquito systems; glass/mirror; ACP/HPL/facade; interiors/architecture/execution.

MOBILE

Accordion drawer, sticky quick actions and simple nested links. Keep it fast and keyboard-accessible.

FOOTER

NAP, business phone, owner mobile, email, Instagram, shop address, major service links, local page and contact actions.

ONLY FULL CINEMATIC HERO

Home Page

HERO

Create layered aluminium-frame + glass + architectural-space 3D scene. Mouse movement gives subtle parallax; finger drag adjusts angle. Overlay semantic H1 and direct WhatsApp / Call / Site Visit CTAs.

SECTIONS

Implement the ten Home sections from the blueprint: capability strip, featured systems, interior/exterior story, wholesale enquiry, project types, visualization/walkthrough, process, projects and local CTA.

SEO

Keep meaningful home copy visible in HTML. Do not put the H1 inside canvas.

Aluminium Pages

TEMPLATE

Build a reusable aluminium-system template: contextual intro, variants, materials/options, applications, interactive profile detail, installation process, gallery, FAQ/CTA.

SPECIFICITY

Give Domal, 45 mm profile doors, 20 mm pooja doors and 16x45 telescopic partitions their own exact sections/spec-context from the blueprint.

CROSS-LINKS

Every page links to related systems and projects; do not create orphan routes.

uPVC Pages

TEMPLATE

Context → configurations → profile/glass choices → performance/maintenance → 3D opening interaction → installation → related work → FAQ/enquiry.

CLAIMS

Do not invent thermal/acoustic percentages, warranties or certifications. Use factual generic benefits only unless the client supplies verified specifications.

Glass + Mirror

TEMPLATE

Context → glass/finish options → hardware/framing → applications → measurement/safety → 3D material interaction → gallery → FAQ/quote.

VISUALS

Use controlled glass transparency/refraction. Never reduce text contrast or readability for the sake of a glassmorphism effect.

PAGES

Cover office glass doors, 12mm partitions, diamond mirror, crystal glass, PVD partitions, structural glazing and glass railings exactly as listed.

Cladding + Facade

TEMPLATE

Context → finish library → system composition → applications → 3D elevation viewer → execution process → projects → site visit CTA.

3D

Let users rotate/tilt a lightweight facade panel stack showing panel, sub-frame and glass/aluminium layers.

ARCHITECTURE/INTERIOR SERVICES

Design + Execution

PAGES

Architectural Designing, Interior Designing, Exterior Designing, Space Planning, Modular Kitchens, Furniture Selection, 3D Visualization, Walkthroughs, Project Supervision and Execution Works.

TEMPLATE

Context → service scope → planning/options → deliverables → interactive spatial visual → workflow → related services → consultation CTA.

SEO

Keep these pages distinct from product pages; they target design/service buyers rather than material-system search intent.

RESIDENTIAL, COMMERCIAL, HOSPITALITY

Projects

PORTFOLIO

Build project filters by project type and work type. Use accessible filter buttons and crawlable case-study links.

DATA

Create project data objects with title, type, location, services, images and related route links. Only use client-supplied/verified project facts.

3D

Project cards may use subtle depth and image layering; no heavy 3D scene required.

Wholesale Funnel

PURPOSE

/wholesale-aluminium-iron-products is a lead-generation catalog, not a checkout flow.

FORM

Fields: name, phone, buyer type, product/profile, size/specification, quantity, pickup/delivery preference, site/location, notes. Add WhatsApp handoff.

CONTENT

Do not hardcode “in stock” or current rates unless a verified data source is provided. Use “confirm current rate/availability” language.

LEAD CAPTURE

Forms + Contact

FORMS

Build validated contact/site-visit/quote forms with minimal required fields and server-side validation. Add honeypot/rate limiting or equivalent spam protection.

WHATSAPP

Create prefilled WhatsApp messages using the supplied owner/business contact chosen by the client configuration. Avoid exposing unsupported automated messaging.

MAP

Contact and local pages include the supplied shop address and directions/map action.

NO ADMIN DASHBOARD

Content Architecture

DATA MODEL

Create typed data files such as business.ts, routes.ts, services.ts, products.ts, projects.ts, faqs.ts and navigation.ts.

NO CMS

Do not implement authentication, database-backed page editing, CMS dashboards or visual section editors.

MAINTAINABILITY

Every page template reads structured content so future developer edits happen in one content object instead of hand-editing repeated JSX.

BEFORE LAUNCH

QA Matrix

ROUTES

All 52 routes return 200 and have unique H1/title/description/canonical. No duplicate slugs, broken links or orphan pages.

RESPONSIVE

Test desktop, tablet, Android Chrome and iPhone Safari. Verify 3D fallback/reduced motion and touch interactions.

FORMS

Test phone links, WhatsApp links, contact forms, map links and error/success states.

SEO

Validate sitemap, robots, structured data, breadcrumbs, alt text, crawlable links and page source rendering.

PRODUCTION READINESS

Deployment

BUILD

Use production build, image optimization, caching and environment variables. Remove debug overlays and development-only assets.

MONITORING

Connect analytics/search measurement if credentials are supplied. Track conversions without blocking page rendering.

HANDOVER

Provide README with setup, build, content-file locations, route registry and how to add a new product/service page in code.

EXECUTE END-TO-END

Final Agent Instruction

MASTER INSTRUCTION

Read the attached 60-page Sky Tech Windows blueprint first. Implement the complete site rather than a mockup. Work route by route, keep a checklist, run the application, use browser inspection to verify desktop and mobile, fix visual/console errors, run the production build, and do not stop with placeholder pages.

ACCEPTANCE

The project is complete only when all 52 public routes exist, the Home-only hero rule is respected, 3D/touch interactions degrade safely, no admin system exists, SEO metadata/sitemap/schema are implemented, forms/contact actions work and the site passes final responsive QA.

DO NOT GUESS

If a business-specific fact such as pricing, warranty, brands, technical profile series, completed-project counts or certifications is not supplied, use neutral editable placeholder copy or omit the claim. Never fabricate it.
